

## Trust is an economic driver and always impacts two measureable outcomes: speed and cost.

Water is the vital substance that sustains all life on this planet. When it's there, everything flourishes and grows. When it's not there, everything withers and dies.

The same is true for trust. Where there is no trust, relationships decay, projects fail, initiatives under-perform, and work grinds to a crawl.

Like a ripple in a pond, trust begins with you.

Leaders who attend the highly interactive Leading at the Speed of Trust® 3.0 work session will increase their personal credibility and practice specific behaviors that increase trust.

**As a result of this course, you will be able to better manage change and lead high-performing teams that are agile, collaborative, innovative, and engaged.**
